Say
hi :) to
smart
Life

Say **hi :)** to smart life!

Experience the complete sense of well-being that a connected home offers with a reliable, simple and user-friendly home automation system.

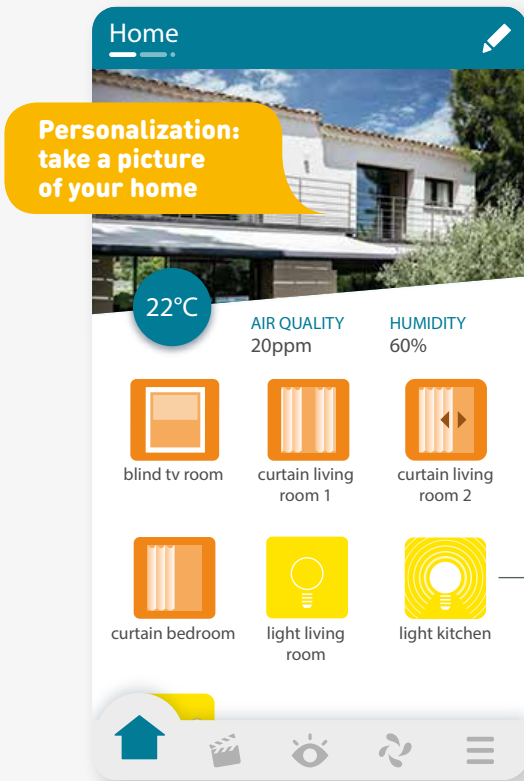

Home Intelligence by Somfy is designed to assist you at all times, make your day to day life easier, and promise you more comfort, more security and more time for yourself.

Whether at home or remotely, the TaHoma Bee App enables you to manage your home using a smartphone and control, centralise and programme all connected equipment: curtains, blinds, lighting, air conditioning, audio & video, etc.

With Somfy, say hello to smart home!

Smart life is **balancing natural and artificial light**

By using the automatic scenarios for your lights, blinds and curtains, TaHoma Bee always ensures that you have the right level of brightness at sunrise or sunset.

Do you like waking up naturally with the sun and spending your evenings in a subdued ambiance? From sunrise, the curtains let the daylight in while the blinds come down at dusk and artificial lighting takes over.

With Home intelligence by Somfy, life will seem even more beautiful to you!

curtains

The right lighting
at all times
throughout the day

Smart life is having perfect climate control

When it gets too hot outside, TaHoma Bee ensures that the temperature inside is kept optimal. With smart sensors, it turns on the air conditioning and activates the curtains which adopt the desired position to keep your home cool!

When the temperature goes high in the middle of the day, the blinds will lower to create a subdued, cool ambiance. Your home will welcome you in comfortable ambiance.

The ideal temperature in all circumstances

Smart life is **taking care of those you love**

At night, the night-lights light up the way thanks to motion detectors positioned throughout the home, creating a lit path.

We all want what is best for our families. Are you worried about tripping over or waking the children up in the middle of the night? At 2AM, you get up to get a glass of water. No need to worry though, as the motion detectors automatically trigger the night lights one by one, all the way to the kitchen.
